Projects

Overworkshop:

- Code: github.com/parrnicholasj/overworkshop2
- Deployed: overworkshop.herokuapp.com
- Used: JavaScript, NodeJS, MySQL, React
- Full-stack MERN Stack project that used a custom-built backend and React powered frontend to deliver “Reddit-like” user review site. Was lead developer, built back end and helped in developing the front end.

Research it World Edition:

- Code: github.com/parrnicholasj/Research-it-World-Edition
- Deployed: parrnicholasj.github.io/Research-it-World-Edition/
- Used: HTML, CSS, JavaScript, jQuery
- A classroom research tool for grades 5-7. Handled API implementation by retrieving the info so it could be put on the pages.

Trivia Game:

- Code: github.com/parrnicholasj/triviaGame
- Deployed: parrnicholasj.github.io/triviaGame/
- Used: JavaScript, HTML, CSS
- History themed trivia game built to practice JavaScript and its timers.

Artillery Game:

- Two-player cooperative networked Unity game that tasks players with identifying and destroying a target. Worked as the primary programmer in getting all the core systems working as well as responsible for integrating the art assets and refactoring in the networking code.
